Product codes can be found in product data sheet tables. The codes provide some basic information about the product while a partially filled configuration code contains complementary information about the detailed specifications. When placing an order, product codes should include the fully completed configuration part. The configuration code part should be placed after the main product code. The main product code and configuration part will appear as shown in the example below:

Structure of configuration code for electric radiators with a heating wire

WWBNN076050

PRODUCT CODE
(located in the table for the product)

K916E1W

CONFIGURATION CODE
(supplemented by hand)

Configuration

K 916 E1 W

Package code Colour code Connection code Type of heating element cable code
K – carton box

Zinc powder primer

C – Code of zinc powder primer is an extra processes

WLAL054030 K916SX **C** – *Extra processes or additions code*
